# Cleanroom furniture

## Cleanroom furniture

Cleanroom furniture is made out of stainless steel sheet (AISI 304 or AISI 316 quality), high pressure laminate (HPL) and/or stone composite. All elements (handles, sinks, hinges, adjustable feet, etc.) integrated in furniture are made out of stainless steel. HPL panels are available in large sizes, reducing unhygienic seams to a minimum with standard thickness of 13 mm (other size on demand.) Key features:

- Ideal for chemical, physical and analytical laboratories
- Excellent impact resistance
- Not adversely affected by moisture
- Easy to clean and excellent resistance to most aggressive chemicals and cleaning agents
- Does not support bacterial growth
- Furniture is made according to the EU GMP and ISO 14644 requirements

### Icon legend:

 AISI 304	Made out of 304 stainless steel sheet	 TRESPA	Made out of high pressure laminate (Trespa). Other brands on request
 AISI 316	Made out of 316 stainless steel sheet	 RAL	Standard white. Other RAL colors on request
	Polished surface		Cabinet without doors
	Satin surface		Cabinet with doors
	Sink with tap		Cabinet with glass doors
	Sink without tap		Cabinet with sliding doors
	Sink with sensor tap		Drawers with doorlock
	Up to 3 desk drawers		Sliding roof
	Bottom shelf for desk		Ventilated cabinet
	Front mask to hide the sink		Cabinet with drawers inside
	Bottom drawers		Cabinet with hanger inside
	Perforated steel		Cabinet with both drawers/hanger inside
	Work surface made out of granite		Bench with shoe compartment
 kerrock	Work surface made out of stone composite (kerrock). Other brands on request		Bench without shoe compartment
